

## **Eagle Vision Pharmaceutical Corporation**

Eagle Vision Pharmaceutical Corp., a private company, is an industry leader in the discovery and development of novel imaging agents that identify the presence, nature and extent of disease; improve treatment planning; and predict and confirm the response to therapy. The company's patented molecular imaging technology enhances and extends the powerful potential of magnetic resonance imaging for diagnosis and management of heart disease, liver disease and cancer.

SeeMore targets heart cells and has successfully completed initial human testing. This agent aims to revolutionize the diagnostic pathway for evaluating patients with heart disease, replacing the more limited, costly and invasive tests currently used with a single, noninvasive, cost-effective procedure.

Eagle Vision Pharmaceutical Corporation is located in Exton, Pa. (Phil Harnish, Chief Executive Officer, 610-363-6828).
