

Wellsheet Appoints Dr. Frederik Lindberg, MD, PhD, and Healthcare Executive as VP of Product Management

Former Flatiron Health executive Dr. Frederik Lindberg, MD, PhD joins Wellsheet management team to lead product management and transform the EHR experience for physicians.

NEWARK, N.J. ([PRWEB](#)) June 26, 2020 -- [Wellsheet Inc.](#), the company transforming the Electronic Health Record (EHR) experience, announced today the appointment of former Flatiron Health, Friendhealth and Experian executive, and infectious disease trained physician, Dr. Frederik Lindberg, as VP of Product Management.

Dr. Lindberg received an MD and PhD in Medical/Molecular Microbiology from Umea University, and trained as a Fellow of infectious diseases at the Washington University School of Medicine in St. Louis. Dr. Lindberg holds 2 patents and his research includes analyzing genes and identifying the most invariable critical components to use as vaccines, and regulation of genes responsible for inducible resistance to antibiotics. After receiving his MD and PhD, Dr. Lindberg continued his career in clinical medicine and molecular biology research, then leapt with both feet into the world of startups, computer technology and data. He has coded, led technology and product teams and served as a founder, CTO and advisor to technology and healthcare companies.

“Technology should do the grunt work, so that clinicians can focus on patients and medical decisions. I’m excited to work with the team here at Wellsheet to transform the EHR and give physicians back that precious time,” said Dr. Frederik Lindberg, VP of Product Management at Wellsheet.

“I’m pleased to welcome Dr. Lindberg to Wellsheet’s management team as VP of Product Management,” said Craig Limoli, CEO and founder of Wellsheet. “Dr. Lindberg is an outstanding leader who understands market needs, how to quickly translate them into new technologies to scale organizations and was critical as our customers deployed Wellsheet as a [COVID-19 tracker and alert system](#). He is respected by clinicians and administrators alike and his unique combination of medicine, research, technology, and leadership are a huge asset to Wellsheet.”

Dr. Chuck Perry, Wellsheet’s Chief Medical Officer, is transitioning out of his current role with the company. Dr. Perry’s contributions during his tenure were fundamental to the commercial and clinical success of Wellsheet. The company thanks him for his service, and wishes him the best.

Wellsheet’s [predictive clinical workflow platform](#) pulls data from the EHR, prioritizes clinical content through specialized machine learning algorithms, and optimizes the provider workflow, anticipating the needs of the doctor to help facilitate a more effortless episode of care. It assembles the right information in an intuitive workflow that allows doctors and nurses to arrive at the right clinical insights. Having this layer on top of the EHR gives clinicians the ability to take action in real time without having to compromise the provider-patient interaction.

Ease of implementation

Traditional implementation timelines to integrate new technology with the EHR are usually prolonged,

cumbersome and costly affairs. Wellsheet uses the Fast Healthcare Interoperability Resources (FHIR) application programming interfaces (APIs), and can pull and prioritize key patient data from multiple data sources for an accelerated implementation and deployment timeline. It also extends the experience to any web browser and any device, such as a tablet or mobile phone, with the same fidelity, and look and feel, across different environments. This is a huge plus for clinicians working across various sites of service in the same facility, or across different EHRs between facilities and different health systems. Wellsheet is a complementary and seamless part of the EHR and is available through the [Cerner](#) and [Epic](#) marketplaces.

About Wellsheet

Wellsheet's predictive clinical workflow platform uses the FHIR API standards to work within an existing EHR to surface the most relevant content for physicians in a view that is contextualized and prioritized for their needs. Its AI-powered workflow is intuitive and integrated with the leading EHRs to reduce a physician's time in the EHR, lessening physician burnout and improving the quality of patient care. Wellsheet's SaaS-based offering is deployed in large healthcare providers.
