

Pillo Health and Orbita Partner to Deliver Engaging Voice-first Experiences via a First-of-its-kind Digital Care Management Platform for the Home

Debuting at HIMSS, the Pillo care management platform offers a patient-friendly interface for health organizations to engage with patients and deliver quality care directly in the home

BOSTON ([PRWEB](#)) February 23, 2018 -- [Pillo Health](#) announced today that it is partnering with [Orbita](#) to create and manage powerful interfaces for the company's care management platform and Pillo device, a first-of-its-kind [in-home companion robot](#) dedicated to healthcare. Pillo sits at the center of the company's care management platform and uses AI algorithms to proactively engage with patients, improve therapy adherence, and deliver personalized care for adults living with chronic conditions, allowing them to healthier and more independent lives.

Leveraging the power of voice experiences, artificial intelligence and data analytics, Pillo assists users with complex therapy regimens, encourages adherence to provider-directed care plans, enables connectivity to care teams, and captures valuable health data from inside the home. Healthcare organizations and caregivers who deliver and manage care in the home use Pillo to reduce costs associated with improving personal and population health outcomes.

The Pillo companion robot will make "its" debut on the HIMSS 2018 exhibit floor at the Pillo Health Booth #10232 in Las Vegas, March 6-9. Orbita will showcase its technology in the Connected Experience Area, Booth #8700-13.

"The Pillo companion device is unlike any other in-home care management product. Pillo serves as a 24 x 7 in-home extension of the care team to accompany a patient at every point on their care journey," said [Emanuele Musini](#), Pillo Health CEO. "Combining voice-first technology with algorithms and architecture dedicated to healthcare is critical to optimizing the power of Pillo as an intelligent in-home care assistant. Hands-down, Orbita has emerged as healthcare's leading voice platform provider and we're thrilled to work with their team of experts to deliver on our joint vision of improved healthcare delivery."

Orbita President [Nathan Treloar](#) said, "Pillo holds great potential as a highly robust entrant in the world of artificially intelligent in-home digital assistants. We're seeing rapid advances in voice, AI and analytics to bring healthcare to a whole new level. We appreciate the opportunity to work with Pillo Health, a company that truly understands and is seizing new technologies to help people live healthier and more independent lives."

About the Pillo Health Platform and the Pillo Device

Pillo Health offers an in-home digital care management platform that provides personalized care for or adults with chronic conditions seeking to live healthier, more independent lives. Pillo is an interactive and engaging companion robot that stores and dispenses medication, shares patient education, guides users to follow provider-directed care plans, and connects patients to care teams and caregivers. It captures data from the home and generates actionable insights for providers of care. www.pillohealth.com

About Orbita

Orbita powers next-generation voice assistant and AI solutions for healthcare that improve the effectiveness and

efficiency of remote patient monitoring, clinical education, care coordination, and research. Organizations across the healthcare industry use Orbita's platform to quickly design, build, and manage voice-first and conversational healthcare applications for smart voice assistants (like Amazon Echo and Google Home) and custom devices as well as web- and mobile-based chat bots. www.orbita.ai
